

set value when create payment return.

Direct Return pacs.008 -> pacs.004

```
PaymentBizDelegate.createPaymentReturnFromExistingPayment() line: 793
-- PaymentUtils#convertInwardRemittanceToOutwardReturn() line: 1103
```

1.1. Value day: default current day. Processor set value, computer one more time in pre-create-transaction

1.2. settlementMethod: opposite with 008 settlement method

1.3. InternalSettlementMethod: get from 008 additional_date key "InternalSettlementMethod "

1.4. charge, Processor set value, computer one more time in pre-create-transaction

1.5. Charge Bearer: default SHARE

1.6. Exchange Info: null

```
+ a.inwardSettlement
  keep unchanged

+ b.OutwardSettlement      remove old value, set new value:
+ bank code = a.inwardSettlement bank code
+ settlement Date = current date
+ Nostro/Vostro Flag= opposite of inwardSettlement
```

Completed remittance Return pacs.004 -> pacs.004

Similar with when create out pacs.008 from iw pacs.008, copy fields from additional_data

```
PaymentBizDelegate.createPaymentReturnFromExistingPayment() line: 814
-- PaymentUtils#convertInwardRemittanceToOutwardReturn() line: 1103
```

1.1. Value day: get from 004 additional_date key: "computedValueDay"

1.2. settlementMethod: get from 004 additional_date key: "stpOutwardSettlementMethod"

1.3. InternalSettlementMethod: get from 004 additional_date key "InternalSettlementMethod"

1.4. charge fields, get from 004 additional_date key: "chargeInfo"

1.5. Charge Bearer: get from 004 additional_date key: "computedChargeBearer"

1.6. Exchange Info: get from 004 additional_date key: "exchangeInfo"
